No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Description
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               셤
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 154, Application US/10012819

Patent No. 6916615

GENERAL INFORMATION:
APPLICANT: Legrain, Pierre
APPLICANT: Selig, Luc
APPLICANT: Rain, Jean-Christophe
TITLE OF INVENTION: Collection of Prokaryotic DNA for Two-Hybrid System, Helicobacter
FITLE OF INVENTION: pylori Protein-Protein Interactions and Applications thereof
FILE REFERENCE: B5053
CURRENT APPLICATION NUMBER: US/10/012,819
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          62 DGVASMIHEVGIEAMPPDGTKLVTVHTPIEANGKLVPGEL-FLKNEDITINEGKKAVSVK 120

CjComplex: heterodimer
CjFunction: catalyzes the hydrolysis of one molecule of urea to carbon dioxide and tw
AjBescription: catalyzes the hydrolysis of one molecule of urea to carbon dioxide and tw
CjFunction: heterodimer; hydrolase; metalloprotein; nickel
CjFunction: heterodimer; hydrolase; metalloprotein; nickel
Fj1-559/Product: urease 62K chain #status experimental <MAT>

A; Reference number: A41502; MUD: 90202165; PMID: 2318539
A; Accession: B41502
A; Molecule type: protein
A; Residues: 1-5, 'A', 7-15 < HUA>
A; Cross-references: UNIPARC: UP10000172DA8
C; Genetics:
A; Gene: ureB; HP0072
C; Complex: heterodimer of 26K chain (see PIR: URKCAP) and 62K chain
C; Function:
A; Description: catalyzes the hydrolysis of one molecule of urea to carbon dioxide and tw
C; Superfamily: urease, alpha subunit; urease 62K chain homology
C; Superfamily: urease, alpha subunit; urease 62K chain homology

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   RESULT 3
C36950
urease (EC 3.5.1.5) 61k chain - Bacillus sp. (strain TB-90)
NyAlternate names: ureC protein
C;Species: Bacillus sp.
C;Date: 07-Jul-1995 #sequence_revision 07-Jul-1995 #text_change 05-Oct-2004
C;Accession: C36950
R;Maeda, M.; Hidaka, M.; Nakamura, A.; Masaki, H.; Uozumi, T.
J; Bacteriol: 176, 432-442, 1994
A;Title: Cloning, sequencing, and expression of thermophilic Bacillus sp. strain TB-90 u
A;Reference number: A36950; MUID:94117379; PMID:8288539
A;Accession: C36950
A;Status: preliminary
A;Molecule type: DNA
A;Residues: 1-569 «MAE>

urease (EC 3.5.1.5) alpha chain - Synechocystis sp. (strain PCC 6803)
N;Alternate names: protein s111750
C;Species: Synechocystis sp.
A;Variety: PCC 6803
C;Date: 25-Apr-1997 #sequence_revision 25-Apr-1997 #text_change 09-Jul-2004
C;Accession: S75169
R;Kaneko, T.; Sato, S.; Kotani, H.; Tanaka, A.; Asamizu, E.; Nakamura, Y.; Miyajima, N.; Okumura, S.; Shimpo, S.; Takeuchi, C.; Wada, T.; Watanabe, A.; Yamada, M.; Yasuda DNA Res. 3, 109-116, 1996
A;Title: Sequence analysis of the genome of the unicellular cyanobacterium Synechocystis
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        A;Cross_references: UNIPROT:P73061; UNIPARC:UP10000137D79; EMBL:D90903; GB:AB001339; NID A;Note: the nucleotide sequence was submitted to the EMBL Data Library, June 1996 C;Genetics:

A, Description: catalyzes the hydrolysis of one molecule of urea to carbon dioxide and two C, Superfamily: urease, alpha subunit; urease 62K chain homology C, Keywords: heterotrimer; hydrolase; metalloprotein; nickel F; 4550/Domain: urease 62K chain homology <406.7
F; 136, 217, 360/Binding site: nickel 2 (His, His, Lys, Asp) #status predicted F; 217, 246, 272/Binding site: nickel 1 (Lys, His, His) #status predicted F; 217/Binding site: aloon dioxide (Lys) (covalent) (by urease activase) #status predicter F; 219, 320/Active site: His #status predicted
                                                                                                                                                                                                                                                                                                             comparison with

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Infect. Immun. 62:1631-1638(1994).

-!- CATALYTIC ACTIVITY: Urea + H(2)0 = CO(2) + 2 NH(3).

-!- COFACTOR: Binds 2 nickel ions per subunit (By similarity).

-!- SUBUNIT: Consists of two subunits (alpha and beta).

-!- FTW: Lys-219 is carbamylated. The carbamoyl group provides the ligands for the two nickel ions (By similarity).

-!- SIMILARITY: Belongs to the urease family.

-!- CAUTION: In Helicobacter the beta subunit is what is known in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             01-NCV-1995 (Rel. 32, Created)

PTM: Lys-219 is carbamylated. The carbamoyl group provides the ligands for the two nickel ions (By similarity).

MISCELLANEOUS: Oligomerization may protect the enzyme against denaturation in an acidic environment (By similarity).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         -!- CATALYTIC ACTIVITY: Urea + H(2)O = CO(2) + 2 NH(3).
-!- COFACTOR: Binds 2 nickel ions per subunit (By similarity).
-!- SUBUNIT: Heterohexamer of 3 alpha and 3 beta subunits. Four heterohexamers assemble to form a 16 nm spherical complex (By
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            SIMILARITY: Belongs to the urease family.

CAUTION: In Helicobacter the beta subunit is what is known in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          genes in Escherichia coli
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Optimum pH is 8.0. Active from pH 4.0 to 10.0;
-1- SUBUNIT: Heterohexamer of 3 alpha and 3 beta subunits. Four heterohexamers assemble to form a 16 nm spherical complex.
-1- PTM: Ly8-219 is carbamylated. The carbamoyl group provides the ligands for the two nickel ions (By similarity).
-1- MISCELLANBOUS: Oligomerization may protect the enzyme against denaturation in an acidic environment.
-1- SIMILARITY: Belongs to the urease family.
-1- SAUTION: In Helicobacter the beta subunit is what is known in other bacteria as the alpha subunit.
